

PROFIMIX Sowing substrate

SUBSTRATE COMPOSITION:

- 70 % Sphagnum White peat 0-5mm
- 30% Brown peat 0-5mm
- Fertilizing capacity: NPK 14-16-18: 0,5 kg/m³
- Microelements (MgO, SO₃, B, Cu, Fe, Mn, Mo, Zn) : 150g/m³

Technical data:

- pH (H₂O): 6 +/- 0,5 (EN 13037)
- EC < 0,6 mS/cm

Physical data (EN 13041):

- Dry matter: 40 – 60 %
- Water capacity: min. 700g/ 100g organic matter
- Air capacity: min. 10%

Packaging:

5m³ Big bale or 225l

Comments:

Professional Sowing Substrate is suitable for sowing, pricking and plant cutting. Its low nutrient content supports fast and uniform seed germination and facilitates the rooting of cuttings.
